DETAILED ACTION

Election/Restrictions

1. A telephone call was made to Robert Pechman on 12/7/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to "removing the first front polarizer from the electronic device; and attaching a second front polarizer from the electronic device", classified in class 455, subclass 566.
- II. Claim 11, drawn to "determining a type of electronic device ...from a menu of available electronic devices", classified in class 379, subclass 265.
- III. Claim 12, drawn to "a method for marketing and distributing front end polarizers", classified in class 186, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the different inventions, which are, a method for front end polarizer removal and replacement, a method for determining a type of electronic device from an available menu or the method for marketing and distributing polarizers, and a method for marketing and selling electronic products, are unrelated. For example, "marketing and selling" is independent of the first two groups.
